FUTURA
TOOLS & TECHNOLOGY

Feature rich & affordable

IDEAL FOR...

- Backhoes
- Excavators
- Dozers
- Skid Steers
- Box Blades

and...

- Red Rod Mounted Readings

Machine Mounted

UNIQUE FEATURES

240° angular reception

This feature is great for all machine operations since you can have continuous operation at almost any jobsite location.

Multiple mount capability

Unlike other dual purpose receivers which have screws and slides, the CR-5 receiver has the magnet built in to the housing so you just have to *snap* the receiver on the machine or to the rod.

LCD display & adjustable volume control low/high

Easy to use. The display allows the user to simply switch between rod and machine mount operations.

Rugged & durable housing

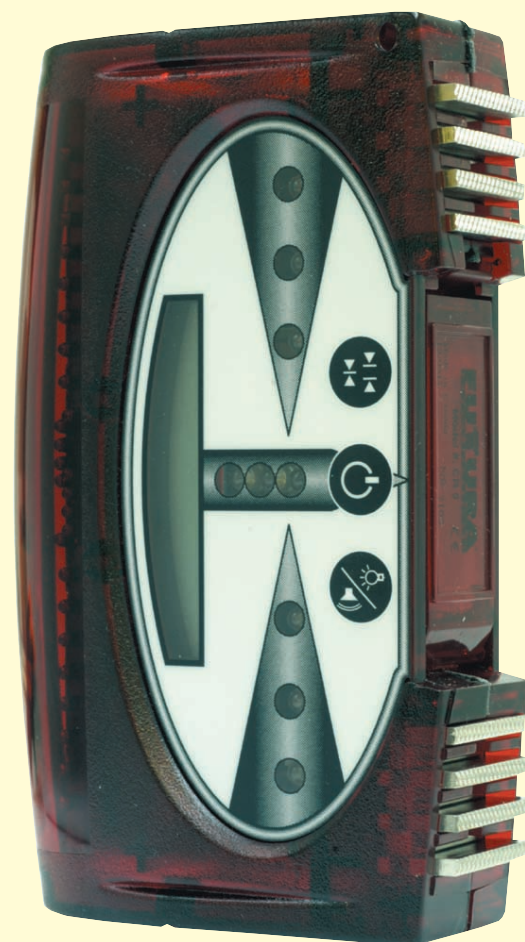

The rugged and fully waterproof housing is designed for all construction and machining requirements.

Bright LED display

Highly visible, 5 channel display with bright green and red LED's that enables the user to read the display at long distances and in bright sunlight.

Strobe light rejection

The CR-5 is the only rod mounted receiver to have strobe light rejection built in.

Padded Carry Case includes

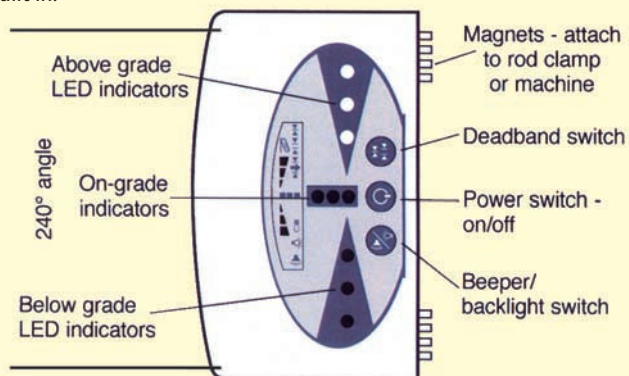

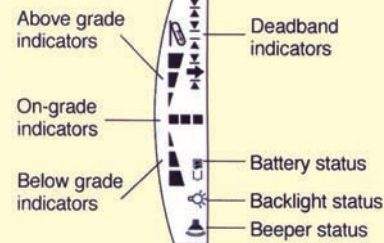

- Instructions
- Safety Pin and Strap
- CR-5 and Rod Clamp
