240° Machine Receiver

MR240

MR240 240° Machine Receiver

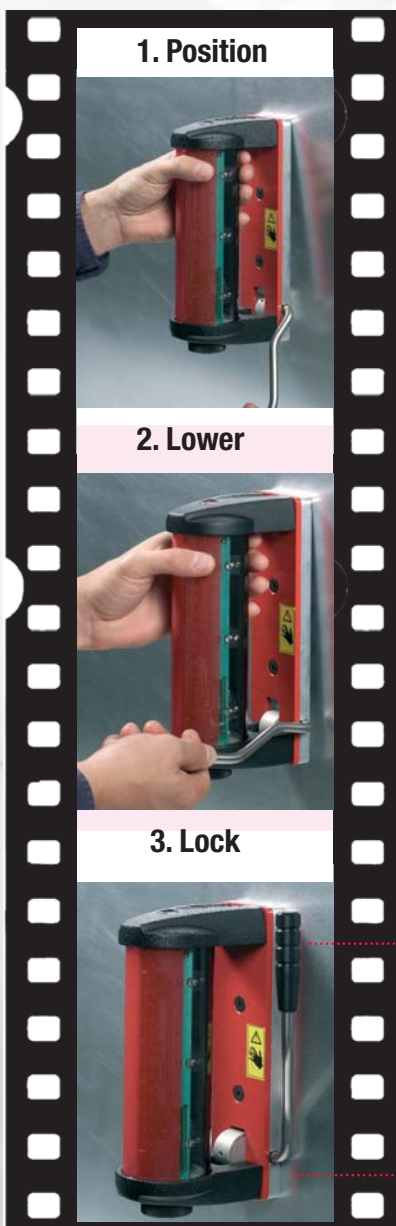

MR240 Machine Receiver Ideal for Excavators

The machine Detector MR 240 helps you quickly and efficiently control the height of the excavator bucket using the laser beam of any current rotational laser.

With its high reception field of 150 mm it detects laser beams in a radius of 240 degrees. The detector remembers the position of the last received signal, so that you can drive back again into the reception field of the MR 240 at any time.

Its extremely strong magnet ensures a direct and secure fixture of the detector directly on the shovel arm. Only with the lever can the MR240 be easily released again.

Applications

Technical Data

Range 250m (Dependant on Laser)

Reception Angle 240 degrees

Reception Field 150 mm

Accuracy Fine +/- 1.5mm - 6mm
Coarse +/- 10mm - 16mm

Water Protection IP67

Operating Time 160 hours

Battery 3 'AA' Cell Batteries LR6

Dimensions 220 x 120 x 100 mm

Weight 1.9 kg (without Batteries)

FEATURES

- 3 Ultra Bright LED Indicators
- Memory Function
- Robust Construction IP67 Water Proof Rating
- Select Between Two Accuracys
- Ultra Strong Magnetic Mount

Authorised Dealer
